

AUTOMAC

CASE ERECTOR

ASC-950

✓ Positive ✓ Flexible ✓ Reliable

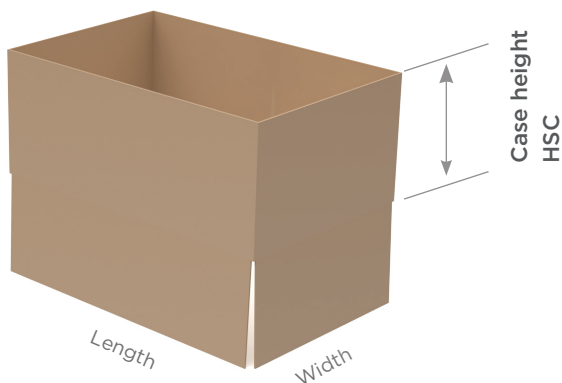

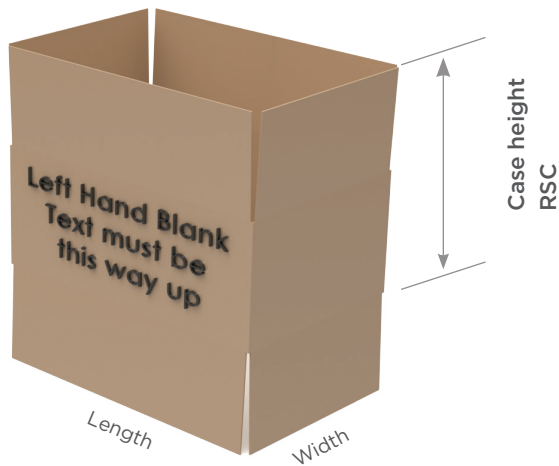

The Automac ASC range of Case Erectors are designed to be Positive, Flexible and Reliable. Our goal is to provide the most reliable Case Erector on the market. We have developed an innovative Case Erector which has patented case-opening technology. This ensures reliable performance even when case quality is less than ideal. Boxes are always sealed squarely because unlike traditional machines that use rough top belts to drive cases out of the machine, we use two drive dogs. This ensures that every box is held square as it is glued or taped.

General case limits

	Minimum	Maximum
Case Length	250mm	600mm
Case Width	150mm	400mm
Case Height - RSC	250mm	600mm
Case Height - HSC	150mm	500mm
Width + Length		950mm

Note: All dimensions are external

Specifications

- Electrical (Option A) - 400V, 20amp, 3 Phase & Neutral
- Electrical (Option B) - 240V, 26amp, 3 Phase & Neutral
- Electrical (Tape seal) - 240V, 10amp, Single Phase
- Pneumatic requirement - 1000 litres/minute
- Pneumatics - Festo or SMC
- PLC - Festo or Omron
- Discharge height - 700mm +/- 50mm
- Box Seal - Glue or Tape
- Glue system - Nordson
- Tape system - Siat
- Machine handing - left or right hand to suit packaging
- Powder coated and Zinc plated finish
- Run on Demand out-feed sensor

Options

- Extended blank magazine

Automac Engineering

Automac Engineering Limited is a privately owned and operated company specializing in the design and manufacture of packaging machinery and conveyors.

The company was established in 2003, to supply innovative and quality equipment. This drive to innovate has allowed Automac to offer several industry firsts and has seen Automac equipment become an industry leader in the Food and Horticulture sectors. This innovation continues today with Automac remaining a design-focused business.

Automac is based in Auckland New Zealand, but has formed strategic partnerships with key businesses around the world which has allowed Automac to become a truly global business. North America is now Automac's largest market.
